SUMMARY

I am an aspiring Data Analyst with a strong understanding of SQL and a passion for working with data, numbers, and patterns. I enjoy solving problems, thinking critically, and finding practical solutions even in ambiguous situations. I work well both independently and in a team, and I am eager to apply my analytical skills and continue learning through Google's Data Analytics Apprenticeship program.

TECHNICAL SKILLS

SQL – Writing queries, Joins, Aggregations, Filtering, Window function, SQL Programming
Excel – PivotTables, VLOOKUP, Power Query, Charts, Dashboards, Data Analysis
Python – Variables, loops, lists, Functions & Logic Building, Numpy, Pandas, for visualize using matplotlib, seaborn
Business Intelligence Tools – Power BI, Tableau
Google Workspace – Sheets, Docs, Gmail, Chrome

PROJECTS

E-Commerce Company, MySQL   **LINK**
   May 2025
- Worked with datasets on customers, products, orders, and order details.
- Wrote SQL queries to study customer behavior, product performance, sales patterns, and inventory levels.
- Discovered insights that could help in marketing, sales, and supply chain decisions.
- Gained hands-on experience in solving real-world business problems using data.

Sales Analysis, Ms-Excel   **LINK**
   Aug 2025
- Built an interactive dashboard to analyze 1,000+ orders, generating insights on revenue, customers, products, and cities.
- Tracked key metrics: total revenue, average customers, orders, and delivery time.
- Visualized revenue by occasion, product category, order time, and month to identify trends.
- Highlighted top 5 products by revenue and top 10 cities by orders for better business decision-making.
- Improved decision support for marketing, product strategy, and inventory planning.

EDUCATION

Bachelor of Science, Mathematics **LINK**   **Aug 2021 - May 2024**
Vinoba Bhave University, Jharkhand
- **Major:** Mathematics
- **Related Coursework**: Calculus, Linear Algebra, Probability & Statistics, Real & Complex Analysis
